

Quality Policy

Expando AB provides advanced technical components and solutions to leading manufacturers of defense and space systems.

Our company's goal is to build lasting, profitable and trustworthy partnerships with customers and suppliers in our selected market segments. This will be done by offering innovative high quality products from carefully selected suppliers, having a clear online presence and offering our suppliers a targeted sales channel and our customers high technical support. Expando complies with all applicable laws, regulations and agreements entered into. We are constantly working on improvements and corrective actions that are constantly being developed through reporting, audits and customer surveys.
